TABLE OF AUTHORITIES ..... iii

INTRODUCTION ..... 1

BACKGROUND ..... 2

    A. The Proposed Class Vehicles Differ in Their Uses And Design. .... 2

    B. A Third-Party Testing Company Certifies That Polaris ROPS  
     Meet The Requirements Of 29 C.F.R. § 1928.53. .... 3

    C. Whether Buyers Read The ROPS Label Varies. .... 6

    D. Whether Buyers Considered The Label In Their Purchases  
     Varies. .... 7

    E. Plaintiffs Have Not Presented Any Evidence Of A Common  
     Understanding Of The Label..... 8

    F. Buyers Considered Differing Information Before Purchase..... 8

    G. Buyers Differ In Why Each Purchased A Polaris SxS. .... 9

    H. Buyers Differ In Whether And Why They Replaced The Stock  
     ROPS..... 10

    I. Prices For Polaris SxSs Are Individually Negotiated And Not  
     Affected By The ROPS Label..... 11

ARGUMENT ..... 13

I. INDIVIDUAL DIFFERENCES PREDOMINATE,  
 PRECLUDING ANY RULE 23(b)(3) CLASS..... 14

    A. Differences In Causation, Reliance, And Materiality  
     Predominate..... 14

        1. Whether Each Buyer Read The ROPS Label Is A  
         Predominant Individual Issue. .... 15

        2. Reliance, Materiality, And Causation Are  
         Predominant Individual Issues..... 17

1           3.     What Each Buyer Believed The ROPS Label Meant Is  
2                 A Predominant Individual Issue. .... 19  
3           4.     No Inference Of Reliance Or Materiality Applies,  
4                 And Any Such Inference Has Been Rebutted. .... 20  
5     B.     Differences In Whether Putative Class Members Have Any  
6             Injury And Received The Benefit Of Their Bargain  
7             Predominate..... 23  
8     C.     Differences In SxS Use Predominate For CLRA Claims. .... 25  
9     D.     Polaris Generals And Certain RZR's Were Not Certified Under  
10            29 C.F.R. § 1928.53 And Cannot Be Part Of The Class. .... 25  
11   II.    PLAINTIFFS HAVE NOT PRESENTED A PROPER  
12           DAMAGES MODEL TO SUPPORT THEIR RULE 23(b)(3)  
13           CLASS..... 25  
14     A.     Plaintiffs Fail To Present Evidence Of Difference In Value,  
15             Which Is Legally Required In Mislabeling Cases. .... 26  
16     B.     Plaintiffs' Proposed Damages Do Not Match Their Liability  
17             Theory. .... 28  
18   III.   PLAINTIFFS' PROPOSED CLASS IS NEITHER SUPERIOR  
19           NOR MANAGEABLE AS REQUIRED UNDER RULE 23(b)(3). .... 30  
20   IV.    NAMED PLAINTIFFS ARE NEITHER TYPICAL NOR  
21           ADEQUATE CLASS REPRESENTATIVES. .... 31  
22     A.     The Named Plaintiffs Have No Legally Viable Claims..... 31  
23     B.     The Disparate Individual Facts Establish That No Claim Is  
24             Typical..... 32  
25     C.     Plaintiffs Are Atypical In Claiming They Considered The Label. .... 32  
26     D.     The Named Plaintiffs Are Subject To Unique Defenses. .... 33  
27   V.     PLAINTIFFS CANNOT CERTIFY ANY RULE 23(b)(2) CLASS. .... 33  
28   CONCLUSION..... 35

**INTRODUCTION**

1  
2 Plaintiffs’ class certification motion is based on a label on Polaris side-by-side  
3 vehicles (“SxSs”) regarding the vehicles’ rollover protective structures (“ROPS”). But  
4 plaintiffs’ motion lacks evidence showing their claims can be established classwide  
5 with common proof. Instead, the record evidence—including from surveys and  
6 individual testimony—establishes that this case is dominated by individual issues based  
7 upon uncommon proof. Few putative class members even read the ROPS label, much  
8 less relied on it or found it material to their purchase decisions. For most buyers the  
9 ROPS label was irrelevant; they bought their SxSs for other reasons entirely.  
10 Certification should be denied.

11 *First*, plaintiffs’ proposed Rule 23(b)(3) class fails because plaintiffs have no  
12 evidence that required elements of their claims such as causation, materiality, and  
13 reliance can be shown with common evidence. Instead, the record evidence is to the  
14 contrary, showing that individual buyers sharply differ on outcome-determinative facts  
15 such as whether they read or considered the label, received the benefit of their bargain,  
16 the information they considered, and the reasons they purchased. Some putative class  
17 members bought SxSs without a label, because the vehicles either had aftermarket  
18 ROPS or were used vehicles without a label. Courts do not presume reliance or  
19 materiality where, as here, the uncontested record establishes that these are individual  
20 issues varying among buyers and dependent upon uncommon proof. Myriad decisions  
21 have denied class certification in misrepresentation cases where buyers differed in  
22 whether they read or relied on the contested language.

23 *Second*, plaintiffs cannot certify a Rule 23(b)(3) class because their attempt to  
24 use cost-of-repair damages in a mislabeling case violates Ninth Circuit precedent and  
25 California law. Moreover, plaintiffs have not proposed valid class-wide damages, but  
26 instead rest on speculation. Plaintiffs hypothesize that at some later date they can use  
27 the cost of repair to determine damages, but plaintiffs have not identified a single ROPS,  
28 or modification to the ROPS, satisfying their interpretation of the ROPS label. Plaintiffs

1 also ignore the numerous differences among SxS models in the alleged class that would  
2 result in differences in any replacement or modified ROPS among these models.

3 *Third*, plaintiffs’ proposed Rule 23(b)(3) class is not superior or manageable.  
4 Uncommon proof among purchasers means any class litigation would require endless  
5 mini-trials to decide the outcome-determinative facts for each individual buyer.

6 *Fourth*, no class can be certified because the two named plaintiffs are not typical  
7 or adequate. Polaris’s summary judgment motion explains why the named plaintiffs  
8 have no valid claims and are subject to unique defenses, including their testimony that  
9 (1) they do not understand the label and do not know whether it contains any  
10 misrepresentations; (2) they continue to drive their SxSs after filing this lawsuit;  
11 (3) they have their young children ride in their SxSs; and (4) their SxSs satisfied their  
12 expectations. Moreover, plaintiffs’ alleged facts are atypical compared to buyers who  
13 do not claim to have read or considered the label and have no alleged injury.

14 *Fifth*, plaintiffs’ Rule 23(b)(2) class fails because owners would not benefit from  
15 plaintiffs’ requested injunction seeking to have Polaris change the label. Putative class  
16 members already own SxSs and so changing the label would not impact their past  
17 purchase decisions. Moreover, the vast majority of owners have no interest in the label.

18 **BACKGROUND**

19 **A. The Proposed Class Vehicles Differ in Their Uses And Design.**

20 Plaintiffs seek a putative class of purchasers for certain Polaris side-by-side  
21 vehicles<sup>1</sup> sold under the brand names “RZR,” “Ranger,” and “General” (though as  
22 discussed subsequently, plaintiffs’ motion excludes all General vehicles). (Pls. Memo  
23 at 11; Ex. 16, Keller Dep. at 21:24-22:6.) Plaintiffs’ putative class makes no distinction  
24 between new and used vehicles. (Pls. Memo at 11.)

25 \_\_\_\_\_  
26 <sup>1</sup> Polaris uses “side-by-side vehicles” or “SxSs” for the three categories of vehicles at  
27 issue. “Off-road vehicles” or “ORVs” describes a broader vehicle category  
28 encompassing SxSs, all-terrain vehicles, and other vehicles. “Utility Terrain Vehicles”  
or “UTVs” is also sometimes used generally for SxSs, and may also refer to a SxS used  
primarily in work rather than recreation, such as the Ranger.

1 RZR, Ranger, and General vehicles differ in their designs, specifications, and  
2 uses. (Ex. 16, Keller Dep. at 21:24-22:6.) The RZR is a recreational vehicle. (Ex. 4,  
3 Mattar Decl. ¶ 10; Ex. 5, Hummel Decl. ¶ 9.) By contrast, the Ranger is a utility vehicle  
4 often used for tasks on a ranch, farm, or workplace. (Ex. 4, Mattar Decl. ¶ 10; Ex. 5,  
5 Hummel Decl. ¶ 9.) Polaris’s website advertises the Ranger as the “#1 trusted UTV by  
6 farmers, ranchers, hunters, and homeowners.” (<https://ranger.polaris.com/en-us/>.)

7 **CONFIDENTIAL -- Subject to Court Order**

8 [REDACTED]  
9 [REDACTED]; *see also* Ex. 2, Hanssens Rep. ¶¶ 68, 72.) The Polaris General  
10 is a crossover vehicle that can be driven recreationally like a RZR while providing some  
11 utility capabilities like the Ranger, with owners using it for either recreational or utility  
12 purposes. (Ex. 4, Mattar Decl. ¶ 10; Ex. 5, Hummel Decl. ¶ 9; Ex. 17,  
13 POLGUZPROD066248.)

14 Plaintiffs’ class definition includes dozens of distinct RZR models, including  
15 one-seat, two-seat, and four-seat vehicles, and dozens of Ranger models, including  
16 two-seat, three-seat, four-seat, and six-seat vehicles. (Ex. 1, Breen Rep. at 6-13.)  
17 Vehicles vary across features such as horsepower, vehicle weight, ground clearance,  
18 and suspension systems. (*Id.*) Model year (“MY”) 2019 RZRs range from 45 to 168  
19 HP and from 10.5 to 16 inches of ground clearance. MY 2019 Rangers vary from 30  
20 to 82 HP and from 1,500 to 2,500 lbs. of towing capacity. (*Id.* at 7-8, 12-13.)

21 **B. A Third-Party Testing Company Certifies That Polaris ROPS Meet**  
22 **The Requirements Of 29 C.F.R. § 1928.53.**

23 Each Polaris SxS comes equipped with a rollover protective structure or “ROPS,”  
24 with the shape, configuration, and design of the ROPS differing among vehicle models.  
25 (Ex. 18, Deckard Dep. at 69:15-70:7; 71:2-10.) Polaris, like other manufacturers,  
26 voluntarily complies with the American National Standards Institute / Recreational  
27 Off-Highway Vehicle Association standard providing that the ROPS shall comply with  
28 the performance requirements of either International Organization for Standardization

1 (“ISO”) standard 3471 or Occupational Safety and Health Administration (“OSHA”)  
2 regulation 29 C.F.R. § 1928.53. (Ex. 16, Keller Dep. at 14:14-15:16, 57:3-58:5.)

3 Plaintiffs’ class definition only includes SxSs where a label on the ROPS stated  
4 that it met the requirements of 29 C.F.R. § 1928.53. (Pls. Memo. at 16.) Plaintiffs  
5 exclude MY 2016-2019 Generals from their definition because those are tested to ISO,  
6 a different standard. (Pls. Memo. at 7-8 n.14.) Because the General line begins with  
7 MY 2016 (*see* <https://general.polaris.com/en-us/2016/>), the class definition excludes all  
8 Generals. Polaris also certifies certain RZR’s to the ISO standard: the RZR XP Turbo S  
9 (2-seat variant), RZR Pro XP Turbo S, and RZR RS1. (Ex. 19, Polaris’s Suppl. Resp.  
10 to Interrog. No. 3.) Buyers of these RZR’s also are excluded from plaintiffs’ class  
11 definition.

12 The stock ROPS for the remaining Polaris SxS models in the alleged class come  
13 with a label identifying the certification standard, the vehicle model, and the test weight  
14 (stated as gross vehicle weight (“GVW”)) used for certification testing. (Ex. 20,  
15 POLGUZPROD000022.) An example of the ROPS label is:

16  
17  
18  
19  
20 Plaintiffs allege that Polaris did not use the correct “tractor weight” under  
21 29 C.F.R. § 1928.51 when it calculated certification under 29 C.F.R. § 1928.53.  
22 According to plaintiffs, rather than using GVW, Polaris should have multiplied 110  
23 times 95% of the vehicle’s net engine flywheel horsepower. (Pls. Memo. at 6.)

24 Polaris contracts with third party Custom Products of Litchfield, Inc. (“CP”) to  
25 conduct certification testing of its SxS ROPS pursuant to § 1928.53. (Ex. 21, Wosick  
26 Dep. at 28:2-11; Ex. 18, Deckard Dep. at 18:12-18.) CP also performs ROPS testing  
27 pursuant to § 1928.53 for other manufacturers. (Ex. 22, Schmitt Dep. at 107:12-16.)

28 CP calculates the requirements for the ROPS tests using the formulas set out in

1 OSHA regulation § 1928.53. (Ex. 23, POLGUZPROD013171, at 90; ECF No. 95-1,  
2 Ex. 39 at 24.) Consistent with its own engineering judgment in light of the text and  
3 purpose of the OSHA ROPS standard, CP uses the GVW provided by Polaris as the  
4 tractor weight. (Ex. 22, Schmitt Dep. at 91:7-19; ECF No. 70-9, Ex. 20.)

5 CP does not use the power take-off (“PTO”) horsepower or net engine flywheel  
6 horsepower provisions, sometimes referred to as the “HP ratio,” in § 1928.51 when  
7 conducting ROPS certification tests on SxSs. (Ex. 22, Schmitt Dep. at 113:4-17.)  
8 These provisions apply only to vehicles equipped with a PTO, a device used on tractors  
9 allowing the engine to power an agricultural implement. (*Id.* at 81:22-25, 112:17-20;  
10 Ex. 1, Breen Rep. at 19.) Because SxS (and other off-road vehicles) do not have a PTO,  
11 CP uses GVW as the appropriate measure of tractor weight for certification testing.  
12 (Ex. 22, Schmitt Dep. at 90:11-91:19.)

13 Using GVW in ROPS certification testing under 29 C.F.R. § 1928.53 is accepted  
14 practice in the off-road vehicle industry. (Ex. 1, Breen Rep. at 19-21.) For example,  
15 ROPS labels on the BRP Can-Am Defender HD5 and HD10 state that the ROPS are  
16 certified to the requirements of § 1928.53 and are “Tested at GVWR.” (*Id.* at 21-22.)  
17 The labels on the Honda Talon 1000 and models of the Honda Pioneer also specify  
18 compliance with § 1928.53 using GVW. (*Id.*) CP’s former Director of Testing testified  
19 that, to his knowledge, every SxS ROPS tested to § 1928.53 by CP used GVW,  
20 including competitor models. (Ex. 22, Schmitt Dep. at 113:4-17.)

21 Plaintiffs have not identified, and Polaris is not aware of, any SxS manufacturer  
22 that calculates the tractor weight using the HP ratio for ROPS certification. (Ex. 24,  
23 Guzman’s Resp. to Interrog. Nos. 17-20; Ex. 25, Albright’s Resp. to Interrog. Nos.  
24 17-20.) **HIGHLY CONFIDENTIAL -- Subject to Court Order**

25 [REDACTED]  
26 [REDACTED]  
27 [REDACTED]  
28 [REDACTED]

1 **HIGHLY CONFIDENTIAL -- Subject to Court Order**

2 [REDACTED]

3 [REDACTED]

4 [REDACTED]

5 [REDACTED] Polaris has no knowledge of any aftermarket ROPS  
6 manufacturer that certifies its products to § 1928.53 using the HP ratio and plaintiffs  
7 have identified none. (Ex. 1, Breen Rep. at 21-22; Ex. 26, Kneuper Dep. at 195:12-23.)

8 **C. Whether Buyers Read The ROPS Label Varies.**

9 Most SxS buyers fail even to read the ROPS label. Polaris’s marketing expert  
10 surveyed 110 actual and prospective SxS buyers by presenting them with 360-degree  
11 images of a class vehicle they could inspect. (Ex. 2, Hanssens Rep. ¶¶ 78-107.) After  
12 those inspections, not a single actual or potential buyer even noticed the ROPS label.  
13 (*Id.* ¶ 108.) And only 25% looked at or considered the ROPS. (*Id.* ¶ 109.)

14 Testimony from putative class members confirms they never read the label.  
15 (Ex. 6, Andersen Decl. ¶ 13; Ex. 8, DeMenge Decl. ¶¶ 11, 20; Ex. 9, Fisk Decl. ¶ 12;  
16 Ex. 10, Giannoulis Decl. ¶ 11; Ex. 11, Milligan Decl. ¶¶ 15, 18; Ex. 12, Score Decl.  
17 ¶ 11.) Even long-time Polaris SxS dealers were unaware of the label. (Ex. 4, Mattar  
18 Decl. ¶¶ 14-15; Ex. 5, Hummel Decl. ¶¶ 3, 13.) Dealers confirmed that buyers typically  
19 do not notice it. (Ex. 4, Mattar Decl. ¶ 15; Ex. 5, Hummel Decl. ¶ 14.)

20 Witnesses testified that finding the label is difficult. Plaintiff Guzman admitted  
21 the label is “in the back where it’s hidden” and “not too many people know anything  
22 about” it. (Ex. 27, Guzman Dep. at 140:3-9.) SxS dealers and buyers testified that  
23 seeing the label is not easy. (Ex. 4, Mattar Decl. ¶ 14; Ex. 11, Milligan Decl. ¶ 18.)

24 Even when buyers claim to have seen the label, what they viewed varies among  
25 individuals. Guzman testified he saw only the words “OSHA” and “Polaris” on the  
26 label, and nothing else. (Ex. 27, Guzman Dep. at 28:1-4, 141:7-10, 141:13-142:13,  
27 148:14-20.) Albright read only a “portion” of the label, and did not read the language  
28 regarding the “Test GVW.” (Ex. 28, Albright Dep. at 167:9-13, 171:2-172:16.)

1 Plaintiffs present no evidence of how many buyers saw, much less read, the label.

2 **D. Whether Buyers Considered The Label In Their Purchases Varies.**

3 Whether Polaris SxS buyers considered the label in their purchases differs. Most  
4 buyers never saw the label and could not have considered it. (*Supra* Background.C.)

5 Polaris’s expert surveyed 82 putative class members about why they purchased  
6 their vehicles, and only a single one looked at or considered the ROPS label in their  
7 purchase. (Ex. 2, Hanssens Rep. ¶¶ 38, 58-62.) Indeed, only 34% looked at or  
8 considered any aspect of the ROPS. (*Id.* ¶¶ 59-61.)

9 Moreover, if the ROPS language was a reason for purchase, then it would feature  
10 prominently in social media, user forums, and blogs where buyers discuss their purchase  
11 decisions. (Ex. 2, Hanssens Rep. ¶¶ 14, 113-129; Ex. 3, Langer Rep. ¶¶ 47-50.) But  
12 such online discussions contain virtually no mention of the ROPS label. (*Id.*)

13 Individual purchasers testified they did not consider, much less rely, on the label.  
14 (Ex. 6, Andersen Decl. ¶ 13; Ex. 8, DeMenge Decl. ¶¶ 11, 20; Ex. 9, Fisk Decl. ¶ 12;  
15 Ex. 10, Giannoulis Decl. ¶ 11; Ex. 4, Mattar Decl. ¶ 15; Ex. 11, Milligan Decl. ¶ 18;  
16 Ex. 12, Score Decl. ¶ 11.) Even when a buyer noticed the label, it was not a factor in  
17 the purchase. (Ex. 13, Sieberg Decl. ¶ 13; Ex. 7, Carnibucci Decl. ¶ 11; Ex. 14,  
18 Turincio Decl. ¶ 13.) Owners who plan to buy another SxS testified the label will not  
19 play any role in their future purchases. (Ex. 13, Sieberg Decl. ¶ 16.)

20 Similarly, dealers confirmed that no customer had asked them about the label  
21 during purchase negotiations. (Ex. 4, Mattar Decl. ¶¶ 15, 20-21; Ex. 5, Hummel Decl.  
22 ¶¶ 14, 18-19; Ex. 2, Hanssens Rep. ¶¶ 139-45; Ex. 1, Breen Rep. at 11-12.) Customers  
23 never ask whether a vehicle’s ROPS is certified to any particular standard. (Ex. 5,  
24 Mattar Decl. ¶ 20.)

25 Plaintiffs present no evidence of how many buyers considered or relied on the  
26 label, or would not have bought a SxS without it. HIGHLY CONFIDENTIAL -- Subject to Court Order

27 [REDACTED]

28

1           **E. Plaintiffs Have Not Presented Any Evidence Of A Common**  
2           **Understanding Of The Label.**

3           There is no evidence that any buyer has adopted the complaint’s interpretation of  
4 the label and 29 C.F.R. § 1928.53 to require testing SxSs using the HP ratio. Not even  
5 the named plaintiffs testified that this is how they understood the label. The plaintiffs  
6 did not read 29 C.F.R. § 1928.53 or know what that regulation related to or required.  
7 (Ex. 27, Guzman Dep. at 29:12-30:6, 145:19-21; Ex. 28, Albright Dep. at 65:25-66:15,  
8 163:5-23.) Albright thought that “1928.53” was the price of the ROPS instead of a  
9 regulation. (Ex. 28, Albright Dep. at 173:9-174:5.)

10           Guzman admitted he was unable to identify anything on the label that is false or  
11 misleading. (Ex. 27, Guzman Dep. at 143:12-19, 145:22-25, 193:20-23, 199:7-13.)  
12 Similarly, Albright admitted he did not know whether the ROPS on his vehicle meets  
13 the OSHA requirements of 29 C.F.R. § 1928.53 and did not understand what the label  
14 means. (Ex. 28, Albright Dep. at 176:13-21, 179:20-24.)

15           Plaintiffs have not presented any evidence regarding how absent putative class  
16 members understand the label, or that any putative class member thought it required  
17 testing based on net engine flywheel horsepower, as their complaint alleges.

18           **F. Buyers Considered Differing Information Before Purchase.**

19           Surveys show that putative class members considered differing information  
20 sources and types of before buying a Polaris SxS, with much of that information coming  
21 from third parties, not Polaris. (Ex. 2, Hanssens Rep. ¶¶ 63-65.) Among other  
22 information, 55% discussed the SxS with the dealer, 51% discussed the SxS with friends  
23 or family, 48% reviewed magazine articles, 46% had experience driving the SxS, and  
24 30% reviewed online forums. (*Id.*) Only 46% reviewed manufacturer materials from  
25 Polaris. (*Id.*)

26           Testimony from putative class members further proves the wide array of differing  
27 combinations of information and sources they considered before purchase. Many but  
28 not all conducted online research, some spoke with friends, some compared vehicles at

1 dealerships, a few test drove SxSs, and a few rented SxSs. Some buyers considered  
2 only a few sources and types of information, while others spent up to a year considering  
3 myriad sources and different information before purchasing their SxSs.<sup>2</sup>

4 **G. Buyers Differ In Why Each Purchased A Polaris SxS.**

5 Surveys show a wide variety of reasons for why purchasers bought their SxSs.  
6 For RZR owners, 72 % looked at and/or considered seating and cargo capacity; 66%  
7 style, color, and design; 57% performance; 45% pricing information and promotions;  
8 45% agility, steering, and suspension; and 25% fitness for work-related activities.  
9 (Ex. 2, Hanssens Rep. ¶¶ 66-67.) Only 19% of surveyed RZR owners considered any  
10 labels, with just one considering the ROPS label. (*Id.* ¶¶ 60 n.79, 66-67.) For Ranger  
11 owners, 70% looked at and/or considered performance; 67% seating and cargo capacity;  
12 61% agility, steering and suspension; and 39% fitness for work-related activities. (*Id.*  
13 ¶¶ 66-67.) Only 9% considered any labels, with none considering the ROPS label. (*Id.*)  
14 Prior ordinary-course-of-business surveys by Polaris found similar results, with the  
15 most frequently identified features including the Polaris brand, vehicle performance,  
16 vehicle quality, horsepower, and price. (*Id.* ¶¶ 132-35.)

17 Buyer testimony confirms they had different purchase reasons. Vehicle  
18 suspension was a reason for some buyers but not others; the same was true for  
19 characteristics such as the Polaris brand, price, color, styling, storage space, ground  
20 clearance, ease of operation, and other factors. Individual buyers have differing

---

21  
22 <sup>2</sup> Ex. 6, Andersen Decl. ¶ 8 (online research, publications, uncle who owned RZR, and  
23 rented a RZR); Ex. 7, Carnibucci Decl. ¶¶ 7-8 (owned MY 2011 RZR, online research,  
24 magazines, went to dealerships to compare vehicles); Ex. 8, DeMenge Decl. ¶¶ 7-8  
25 (previously owned a Polaris vehicle, research on online forums, and visited  
26 dealerships); *id.* ¶ 16 (before purchasing RZR RS1 for his wife, researched vehicles at  
27 online forums and looked at different vehicles at dealership); Ex. 19, Fisk Decl. ¶ 7  
28 (riding friend's Polaris RZR); Ex. 10, Giannoulis Decl. ¶ 7 (visited dealership to  
compare vehicles, researched vehicle specifications); Ex. 11, Milligan Decl. ¶ 15  
(before buying RZR RS1 for his wife, online research, YouTube videos, reviews of the  
RS1, and spoke with dealership owner); Ex. 12, Score Decl. ¶ 7 (online research,  
magazines, visited dealers); Ex. 13, Sieberg Decl. ¶ 8 (compared specifications on  
Polaris website, talked to riders at recreation area, looked at competitors); Ex. 14,  
Turincio Decl. ¶ 7 (spent year researching and comparing ORVs, test drove ORVs,  
online research, and watched ORV YouTube videos).

1 combinations of factors they considered important to their purchases.<sup>3</sup>

2 Polaris SxS dealers testified that customers had different reasons for buying  
3 vehicles. Depending on their individual preferences and needs, customers generally  
4 cared about some combination of price, performance, horsepower, suspension,  
5 clearance, tires, towing capacity, color, speed, and accessories. (Ex. 4, Mattar Decl.  
6 ¶¶ 12-13, 21; Ex. 5, Hummel Decl. ¶¶ 11-12.)

7 The named plaintiffs varied in the reasons they purchased their Polaris RZR.  
8 Guzman testified he saw two words on the ROPS label (even though he did not  
9 understand it), but also that ground clearance, vehicle length and width, color, and price  
10 were purchase reasons. (Ex. 27, Guzman Dep. at 105:10-13, 125:9-25.) Albright  
11 claims to have seen a portion of the ROPS label and also considered the suspension,  
12 color, and the RZR having four seats. (Ex. 28, Albright Dep. at 158:13-15.) Albright  
13 testified his purchase was an “all-around decision” where one factor was not more  
14 important than another. (*Id.* at 158:19-25.)

#### 15 **H. Buyers Differ In Whether And Why They Replaced The Stock ROPS.**

16 Some RZR owners replace the ROPS on their vehicles with aftermarket products,  
17 citing the style or look of the ROPS as a reason for doing so. (ECF No. 70-11, Ex. 22;  
18 Ex. 29, Boone Dep. at 43:4-22, 62:8-21, 144:3-6.)

---

19  
20 <sup>3</sup> Ex. 6, Andersen Decl. ¶ 12 (reliability, power, and friends were happy with RZR they  
21 owned); Ex. 7, Carnibucci Decl. ¶ 9 (extra power, improved suspension, power steering,  
22 color, dealership gave fair trade-in price for prior ORV); Ex. 8, DeMenge Decl. ¶ 9  
23 (wanted a Polaris vehicle, longer wheel base, and more storage space); *id.* ¶¶ 17-18  
24 (purchased wife’s RZR RS1 because she prefers to drive, did not need extra space, sight  
25 lines were clear, and it was a lower price); Ex. 9, Fisk Decl. ¶ 8 (performance,  
26 suspension, style, and experience driving friend’s vehicle); Ex. 10, Giannoulis Decl.  
27 ¶¶ 8-9, 12 (more familiar with Polaris; Polaris vehicles hold up better during rollovers;  
28 RZR fit in trailer; liked that RZR could be customized, has a navigation system and  
suspension system, and overall quality of RZR); Ex. 11, Milligan Decl. ¶ 9 (for MY  
2018 RZR XP 4 Turbo, active suspension system, styling, power, setup, ride command,  
user friendliness, space to transport dogs); *id.* ¶¶ 16-17 (for MY 2018 RZR RS1,  
rollover protection in a non-ATV, Polaris is a pioneer in ORVs, and how Polaris builds  
ORVs); Ex. 12, Score Decl. ¶¶ 6, 8-9, 12 (true desert vehicle with high ground  
clearance, performance, price); Ex. 13, Sieberg Decl. ¶¶ 10, 14 (reliable, economical,  
light, fuel-efficient vehicle that was easy to operate; purchased vehicle based on size,  
price, and reliability); Ex. 14, Turincio Decl. ¶¶ 8, 14 (better visibility and overall ride  
than competitors, wife wanted bright color, reliability of Polaris vehicles).

1 Approximately 28% of surveyed putative class members own Polaris SxSs whose  
2 stock ROPS has been replaced with an aftermarket ROPS or roll cage. (Ex. 2, Hanssens  
3 Rep. ¶¶ 75-77; *see also* Ex. 3, Langer Rep. ¶ 55 **CONFIDENTIAL -- Subject to Court Order**  
4 **CONFIDENTIAL -- Subject to Court Order**; Ex. 6, Andersen Decl. ¶ 11;  
5 Ex. 9, Fisk Decl. ¶ 12.) **CONFIDENTIAL -- Subject to Court Order**

6 **CONFIDENTIAL -- Subject to Court Order** These putative class  
7 members include purchasers who bought Polaris SxSs where the dealer already had  
8 replaced the stock ROPS with an aftermarket ROPS. (Ex. 2, Hanssens Rep. ¶¶ 76-77;  
9 *see also* Ex. 11, Milligan Decl. ¶ 8.) Others ordered an aftermarket ROPS at purchase  
10 that was installed before, or shortly after, they took delivery of their SxSs. (Ex. 6,  
11 Andersen Decl. ¶ 11; Ex. 9, Fisk Decl. ¶ 11.)

12 Aftermarket ROPS manufacturers build ROPS that can be outfitted on certain  
13 MY 2015-2019 RZR. (Ex. 1, Breen Rep. at 7-8.) None certify their ROPS to any  
14 standard. (*Id.* at 8-11.) Buyers purchase these aftermarket ROPS even though they do  
15 not include a label certifying compliance with 29 CFR § 1928.53 or another standard.  
16 (Ex. 6, Andersen Decl. ¶ 14; Ex. 9, Fisk Decl. ¶ 13; Ex. 11, Milligan Decl. ¶ 8; *see also*  
17 Ex. 4, Mattar Decl. ¶ 18; Ex. 3, Langer Rep. ¶ 51.)

18 Customers who replaced the stock ROPS, or who bought a SxS with an  
19 aftermarket ROPS, did so for different reasons. Buyers typically purchase aftermarket  
20 or customized ROPS for aesthetic purposes, such as a unique or sleeker look. (Ex. 4,  
21 Mattar Decl. ¶ 19; Ex. 5, Hummel Decl. ¶ 15.)

22 **I. Prices For Polaris SxSs Are Individually Negotiated And Not Affected**  
23 **By The ROPS Label.**

24 Polaris sets a Manufacturer's Suggested Retail Price ("MSRP") as a suggested  
25 price for each SxS. (Ex. 15, Miriovsky Decl. ¶ 4.) Polaris-authorized dealers pay a  
26 price different from MSRP when the dealers purchase Polaris SxSs. (*Id.*)

27 Buyers individually negotiate with dealers such that prices differ from MSRP by  
28 amounts unique to each buyer. (Ex. 3, Langer Rep. ¶¶ 80-93; Ex. 4, Mattar Decl. ¶ 22;

1 Ex. 15, Miriovsky Decl. ¶ 7.) What a buyer pays depends on factors including rebates  
2 and cash payments, dealer inventory levels, down payments, financing terms, trade-ins,  
3 accessory purchases, and dealer negotiations. (Ex. 3, Langer Rep. ¶¶ 52.)

4 There is no evidence that the ROPS label affects Polaris SxS prices. (Ex. 3,  
5 Langer Rep. ¶¶ 13-16, 23-70.) **HIGHLY CONFIDENTIAL -- Subject to Court Order**

6  
7 Polaris does not factor in the ROPS label when setting the MSRP. (Ex. 15, Miriovsky  
8 Decl. ¶ 6; *see also* Ex. 3, Langer Rep. ¶¶ 58-59.) Polaris did not use the label's language  
9 in its marketing materials. (Ex. 2, Hanssens Rep. ¶¶ 15, 17, 151-166; Ex. 3, Langer  
10 Rep. ¶¶ 56-67.) Polaris dealers do not mention the label during the sales process and it  
11 does not enter into price negotiations. (Ex. 4, Mattar Decl. ¶ 15; Ex. 5, Hummel Decl.  
12 ¶¶ 19-20; Ex. 3, Langer Rep. ¶¶ 52-55.) Nor do dealerships use the label or its language  
13 in marketing materials such as YouTube videos. (Ex. 2, Hanssens Rep. ¶¶ 167-74;  
14 Ex. 3, Langer Rep. ¶¶ 53-54.) Buyers generally are unaware of the label and do not  
15 consider it. (*Supra* Background.C-D; Ex. 3, Langer Rep. ¶¶ 46-51.)

16 Market data confirms that the ROPS label does not affect vehicle prices. In 2017,  
17 Polaris changed the ROPS label of 2017 MY Generals from stating they met the OSHA  
18 requirements of 29 C.F.R. § 1928.53 to being tested to the ISO standard. (Ex. 3, Langer  
19 Rep. ¶¶ 24-43.) This change had no statistically significant impact on 2017 MY General  
20 prices. (*Id.* ¶¶ 37-42.)

21 Even if the ROPS label might have affected the price of a particular SxS purchase,  
22 any such effect would differ for each buyer. (Ex. 3, Langer Rep. ¶¶ 71-93; Ex. 2,  
23 Hanssens Rep. ¶¶ 18, 175.) This is shown by the heterogeneity across the vehicle  
24 models in the putative class, in demand and supply factors, and in transaction prices of  
25 the alleged class vehicles. (Ex. 3, Langer Rep. ¶¶ 71-93; Ex. 2, Hanssens Rep. ¶¶ 18,  
26 175.)

27 Plaintiffs do not present any evidence that the ROPS label affected SxS prices.

28 **HIGHLY CONFIDENTIAL -- Subject to Court Order**

1 **ARGUMENT**

2 The record evidence establishes that putative class members and their SxS  
3 purchases differ in myriad and outcome-determinative ways. Buyers differ in whether  
4 they saw the ROPS label, read it, relied on it, or considered it material to their purchases;  
5 whether the label became part of each buyer’s bargain or affected the price each paid  
6 for the SxS; and whether each would benefit from plaintiffs’ proposed damages and  
7 injunctive relief. The named plaintiffs differ from absent class members, are subject to  
8 unique defenses, and have not proposed a classwide damages methodology. No  
9 presumption or inference of reliance, materiality, or any other elements of plaintiffs’  
10 claims can apply here because plaintiffs present no evidence these elements can be  
11 established through common proof. In contrast, Polaris has presented overwhelming  
12 evidence, including surveys, individual testimony, and other facts, demonstrating that  
13 all of these elements are individual questions. Given this record, plaintiffs cannot  
14 satisfy the requirements of class certification and their motion should be denied.

15 Plaintiffs bear the burden of proving each requirement of Rule 23. *Zinser v.*  
16 *Accufix Research Inst. Inc.*, 253 F.3d 1180, 1186 (9th Cir. 2001).<sup>4</sup> Plaintiffs seeking  
17 class certification “must actually prove—not simply plead—that their proposed class  
18 satisfies each requirement of Rule 23.” *Halliburton Co. v. Erica P. John Fund, Inc.*,  
19 573 U.S. 258, 275 (2014) (emphasis in original). “[C]ertification is proper only if the  
20 trial court is satisfied, after a rigorous analysis, that the prerequisites of Rule 23(a) have  
21 been satisfied.” *Wal-Mart Stores, Inc. v. Dukes*, 564 U.S. 338, 350-51 (2011).

22 A district court’s “rigorous analysis” of the class certification request requires  
23 consideration of the merits to the extent these overlap with Rule 23’s requirements.  
24 *Ellis v. Costco Wholesale Corp.*, 657 F.3d 970, 981-84 (9th Cir. 2011). The district  
25 court should resolve any factual disputes, or disputes among experts, necessary to  
26 determine whether Rule 23’s requirements are satisfied. *Id.* at 982-83.

27  
28

<sup>4</sup> All citations omit internal quotation marks, brackets, ellipses, and other modifications unless otherwise indicated.

1 Plaintiffs seek Rule 23(b)(3) certification and must prove “that the questions of  
2 law or fact common to class members predominate over any questions affecting only  
3 individual members.” Fed. R. Civ. P. 23(b)(3). “An individual question is one where  
4 ‘members of a proposed class will need to present evidence that varies from member to  
5 member.’” *Tyson Foods, Inc. v. Bouaphakeo*, 136 S. Ct. 1036, 1045 (2016).

6 Plaintiffs also seek Rule 23(b)(2) certification, which requires, among other  
7 elements, proof “that final injunctive relief ... is appropriate respecting the class as a  
8 whole.” *E.g., Victorino v. FCA US LLC*, 326 F.R.D. 282, 308 (S.D. Cal. 2018).

9 “For purposes of class certification, the UCL, FAL, and CLRA are  
10 indistinguishable.” *Shanks v. Jarrow Formulas, Inc.*, 2019 WL 4398506, at \*4 (C.D.  
11 Cal. Aug. 27, 2019).

12 **I. INDIVIDUAL DIFFERENCES PREDOMINATE, PRECLUDING ANY**  
13 **RULE 23(b)(3) CLASS.**

14 **A. Differences In Causation, Reliance, And Materiality Predominate.**

15 The “UCL, FAL, and CLRA have independent requirements for standing, which  
16 mandate allegations of actual reliance” on the alleged misrepresentation at issue.<sup>5</sup>  
17 (ECF No. 38, MTD Order § III.A at 5 (quoting *Stewart v. Electrolux Home Prod., Inc.*,  
18 2018 WL 1784273, at \*4 (E.D. Cal. Apr. 13, 2018)); *see also, e.g., Block v. eBay, Inc.*,  
19 747 F.3d 1135, 1140 (9th Cir. 2014); *Sateriale v. R.J. Reynolds Tobacco Co.*, 697 F.3d  
20 777, 793-94 (9th Cir. 2012).

21 “To state a claim under [UCL] section 17200, a plaintiff must allege that a  
22 defendant’s unlawful, unfair, or fraudulent business practices caused her an economic  
23 injury. That causal connection is broken when a complaining party would suffer the  
24 same harm whether or not a defendant complied with the law.” *Williams v. Bank of*

---

25  
26 <sup>5</sup> Before November 2, 2004, UCL and FAL claims did not require individualized proof  
27 of reliance, injury, or damages. *Hall v. Time Inc.*, 158 Cal. App. 4th 847, 852 (2008).  
28 On that date, Proposition 64 changed the UCL and FAL to require plaintiffs to prove  
they have “suffered injury in fact” and “lost money or property as a result of such unfair  
competition.” *Id.* Earlier case law that did not require reliance, and decisions that  
mistakenly continue to rely on such case law, have been superseded by Proposition 64.

1 *Am., N.A.*, 701 F. App'x 626, 629 (9th Cir. 2017); *see Hall v. SeaWorld Entm't, Inc.*,  
2 747 F. App'x 449, 452 (9th Cir. 2018); *Saber v. JPMorgan Chase Bank, N.A.*,  
3 2014 WL 2159395, at \*3-4 (C.D. Cal. May 22, 2014). If a plaintiff would have  
4 purchased a product regardless of the defendant's alleged misrepresentation, that  
5 plaintiff cannot prove causation. *Clark v. Hershey Co.*, 2019 WL 6050763, at \*2 (N.D.  
6 Cal. Nov. 15, 2019). This also applies to FAL and CLRA claims, which similarly  
7 require causation.

8 Finally, the statutes require proof that the alleged misrepresentation was material  
9 to the consumer's purchase decision. *E.g., Shanks*, 2019 WL 4398506, at \*4; *Townsend*  
10 *v. Monster Beverage Corp.*, 303 F. Supp. 3d 1010, 1029 (C.D. Cal. 2018); *Ono v. Head*  
11 *Racquet Sports USA, Inc.*, 2016 WL 6647949, at \*10 (C.D. Cal. Mar. 8, 2016).

12 To "establish predominance under Rule 23(b)(3), courts typically require that  
13 plaintiff demonstrate that reliance and causation are subject to common proof."  
14 *In re 5-Hour Energy Mktg. & Sales Practices Litig.*, 2017 WL 2559615, at \*2, 6 (C.D.  
15 Cal. Jun 7, 2017). Plaintiffs fail to satisfy this requirement. The facts regarding these  
16 elements, and materiality, vary for each buyer, and depend on uncommon proof.

17 **1. Whether Each Buyer Read The ROPS Label Is A Predominant**  
18 **Individual Issue.**

19 If buyers have not read the label, they cannot possibly have relied on it. Judge  
20 Staton dismissed plaintiffs' First Amended Complaint because "Plaintiffs never allege  
21 that *they* read and relied upon the sticker." (ECF No. 38, MTD Order § III.A at 5-6  
22 (collecting cases).) Similarly, if a buyer was unaware of the label it could not have  
23 caused or been a material factor in their decision to purchase a Polaris SxS.

24 Moreover, it "is not enough to 'receive' a misrepresentation in a document [or  
25 product]; a plaintiff must see, read, or hear the alleged misrepresentation and rely on  
26 it." *Graham v. VCA Antech, Inc.*, 2016 WL 5958252, at \*5 (C.D. Cal. Sept. 12, 2016).<sup>6</sup>

27  
28 <sup>6</sup> *See also In re iPhone Application Litig.*, 6 F. Supp. 3d 1004, 1022-23 (N.D. Cal. 2013)  
(rejecting plaintiffs' argument that receiving an alleged misrepresentation is sufficient

1 While plaintiffs assert buyers were “exposed” to the label (Pls. Memo. at 18), the term  
2 “exposed” in the reliance case law means that a buyer must have “heard, read, or saw”  
3 the alleged misrepresentation. *Stewart*, 2018 WL 1784273, at \*5. This case law reflects  
4 common sense, as a person who “receives” or is “exposed” to a representation but does  
5 not become aware of its contents cannot possibly rely on it in purchasing a product.

6 Courts deny class certification of misrepresentation claims where not all class  
7 members saw or read the alleged misrepresentation. *E.g.*, *Cohen v. DIRECTV, Inc.*, 101  
8 Cal. Rptr. 3d 37, 47 (Cal. Ct. App. 2009) (“The record supports the trial court’s finding  
9 that common issues of fact do not predominate ... because the class would include  
10 subscribers who never saw DIRECTV advertisements or representations”); *Moheb v.*  
11 *Nutramax Labs. Inc.*, 2012 WL 6951904, \*4 (C.D. Cal. Sept. 4, 2012) (defendant’s  
12 alleged misrepresentation was not a common issue “because some of the members of  
13 the Class never saw or relied upon Defendant’s representation”).<sup>7</sup>

14 Surveys showed that actual and potential SxS buyers did not read the ROPS label  
15 before buying their SxSs. (*Supra* Background.C.) Individual buyers testified they did  
16 not read the label in purchasing their SxSs. (*Id.*) Plaintiffs have not submitted any  
17 evidence that absent putative class members saw or read the label. (*Id.*)

18 Even the few buyers who might claim to have seen the label would vary in what  
19 words they saw. Guzman only saw the words “Polaris” and “OSHA,” and did not read  
20 the language regarding 29 C.F.R. § 1928.53 that forms the basis of plaintiffs’ claims.  
21 (*Supra* Background.C.) Albright read only a “portion” of the label, and did not read the  
22 language explaining the GVW used to test the vehicle. (*Id.*) Such differences create  
23 individual issues, as whether a buyer can show reliance and other elements depends on

24 \_\_\_\_\_  
25 to state a claim where plaintiffs did not read or rely on it); *Stewart*, 2018 WL 1784273,  
26 at \*5; *Hall v. Sea World Entm’t, Inc.*, 2015 WL 9659911, at \*5 (S.D. Cal. Dec. 23,  
2015); *Doe v. SuccessfulMatch.com*, 70 F. Supp. 3d 1066, 1082 (N.D. Cal. 2014).

27 <sup>7</sup> *Sotelo v. MediaNews Grp., Inc.*, 143 Cal. Rptr. 3d 293, 306 (Cal. Ct. App. 2012),  
28 *disapproved of in part on other grounds by Noel v. Thrifty Payless, Inc.*, 445 P.3d 626  
(Cal. 2019); *Sevidal v. Target Corp.*, 117 Cal. Rptr. 3d 66, 85 (Cal. Ct. App. 2010);  
*Jones v. ConAgra Foods, Inc.*, 2014 WL 2702726, at \*14-16 (N.D. Cal. June 13, 2014).

1 whether he or she saw the label and how much of its language the buyer read.

2 Determining whether each buyer saw the label and what portions (if any) they  
3 read before buying will require individual evidence, such as testimony from each buyer,  
4 testimony from anyone accompanying the buyer during the purchase, and evidence  
5 from the dealership from whom the buyer purchased the Polaris SxS, among other  
6 evidence. This fundamental, outcome-determinative individual issue depends on  
7 uncommon proof and predominates over any supposed common issues.

8 Moreover, some buyers could not have read the ROPS label because it had been  
9 removed from the Polaris SxS before those buyers purchased their SxSs. For some  
10 SxSs, dealers replace the stock ROPS with an aftermarket ROPS before sale, and these  
11 aftermarket ROPS do not include any label. (Ex. 11, Milligan Decl. ¶ 8.) Plaintiffs’  
12 putative class also includes buyers of used SxSs, which may have had the ROPS label  
13 removed. (Ex. 9, Fisk Decl. ¶ 12; *see also* Ex. 11, Milligan Decl. ¶ 12.) Thus,  
14 individual evidence and mini-trials would be necessary to determine whether each  
15 buyer’s SxS came with a ROPS label that the buyer could have read.

16 **2. Reliance, Materiality, And Causation Are Predominant**  
17 **Individual Issues.**

18 The evidence establishes that reliance, causation, and materiality are individual  
19 issues. (*Supra* Background.D.) Surveys of putative class members found that only one  
20 of 82 respondents claims to have considered the ROPS label in their purchase. Besides  
21 the two plaintiffs, each of the nine other individual Polaris SxS buyers who testified  
22 explained the label had no role in their purchases. Many consumers replace the stock  
23 ROPS with aftermarket ROPS that do not have any labels, further demonstrating that  
24 many buyers do not care about the label. (*Supra* Background.H.) Thus, the  
25 overwhelming majority of putative class members did not consider the label, they could  
26 not have relied on it or considered it material, and it cannot have caused their purchases.

27 For any buyers who claim to have considered the label, individual evidence  
28 would be necessary to determine if it was a “substantial factor” in each purchase, as

1 required for reliance and causation. *Sud v. Costco Wholesale Corp.*, 229 F. Supp. 3d  
2 1075, 1083 (N.D. Cal. 2017). Buyers had a variety of reasons—and combinations of  
3 reasons—for buying their SxSs, including performance, cargo capacity, style and color,  
4 pricing, steering, suspension, and others. (*Supra* Background.G.) Each buyer weighs  
5 whatever reasons they consider differently, with some being more important than  
6 others. Individual evidence would be needed to determine if the label was a “substantial  
7 factor” in light of each buyer’s other purchase reasons. *E.g., Reynante v. Toyota Motor*  
8 *Sales USA, Inc.*, 2018 WL 329569, at \*4-5 (Cal. App. Ct. Jan. 9, 2018) (denying  
9 certification because “even if a customer was misled by the fuel calculator, this does  
10 not necessarily mean that the calculation caused the customer to purchase the vehicle”).

11 Courts deny class certification where the evidence establishes that a significant  
12 percentage of buyers did not rely on the alleged misrepresentation and had other reasons  
13 for buying the product. *E.g., id.* at \*4-5 (denying certification where “defendants  
14 presented evidence that the materiality of, or reliance upon, the fuel calculator’s  
15 [allegedly false] calculation would vary from consumer to consumer”); *Shanks*,  
16 2019 WL 4398506, at \*4, 7 (denying certification based on survey evidence  
17 demonstrating that buyers typically did not purchase a product based on plaintiffs’  
18 interpretation of the label and where “Plaintiff has not introduced any evidence to  
19 suggest that any other proposed class members similarly relied on, and were misled by,  
20 these statements.”); *5-Hour Energy*, 2017 WL 2559615, at \*7-8 (denying certification  
21 where “Defendants’ evidence suggests that the representations are not material to most  
22 or even a substantial portion of the class,” and “[a]bsent a consumer survey or other  
23 market research to indicate how consumers reacted to the ... statements, and how they  
24 valued these statements compared to other attributes of the product and the ... market  
25 generally, Plaintiffs have not offered sufficient evidence of materiality across the  
26 class”).<sup>8</sup> The evidence here presents an even more compelling case for denying

---

27  
28 <sup>8</sup> *Townsend*, 303 F. Supp. 3d at 1047; *Lucas v. Breg, Inc.*, 212 F. Supp. 3d 950, 969  
(S.D. Cal. 2016); *Pierce-Nunes v. Toshiba Am. Info. Sys., Inc.*, 2016 WL 5920345, at

1 certification because the vast majority of buyers did not consider the label, and thus  
2 could not have relied on it, found it material, or had the label cause their purchase.

3 The lack of any class-wide impact on Polaris SxSs’s real-world market prices  
4 confirms that buyers’ SxS purchases were not affected by the label. In *McLaughlin v.*  
5 *Am. Tobacco Co.*, an institute published Monograph 13 disclosing that light cigarettes  
6 were not safer than regular ones, leading to the *McLaughlin* plaintiffs’ suit. 522 F.3d  
7 215, 220-21 (2d Cir. 2008), *abrogated in part on other grounds by Bridge v. Phoenix*  
8 *Bond & Indem. Co.*, 553 U.S. 639 (2008); *see also In re NJOY, Inc. Consumer Class*  
9 *Action Litig.*, 120 F. Supp. 3d 1050, 1119 (C.D. Cal. 2015) (following *McLaughlin*). In  
10 reversing certification because causation and reliance were individual issues,  
11 *McLaughlin* held that “the fact that the market did not shift away from light cigarettes  
12 after the publication of Monograph 13 is compelling evidence that plaintiffs had other,  
13 non-health-related reasons for purchasing Lights.” 522 F.3d at 226; *see also id.* at 227.

14 Plaintiffs have not presented any evidence of a price impact from the ROPS label.  
15 The only evidence is that the ROPS label, and changing that label, had no impact on  
16 Polaris SxS prices. (*Supra* Background.I.) This “compelling evidence” reinforces the  
17 surveys and individual testimony demonstrating that most putative class members’  
18 purchase decisions were unaffected by the label, precluding classwide proof of  
19 causation, materiality, or reliance.

### 20 **3. What Each Buyer Believed The ROPS Label Meant Is A** 21 **Predominant Individual Issue.**

22 “Where plaintiffs fail to establish a controlling definition for a key term in an  
23 alleged misstatement, courts have found that materiality is not susceptible to common  
24  
25

---

26 \*8 (C.D. Cal. June 23, 2016); *In re ConAgra Foods*, 302 F.R.D. 537, 576-77 (C.D. Cal.  
27 2014); *Jones*, 2014 WL 2702726, at \*14-16; *Johnson v. Harley-Davidson Motor Co.*  
28 *Grp. LLC*, 285 F.R.D. 573, 576, 581 (E.D. Cal. 2012); *Moheb*, 2012 WL 6951904, at

1 proof.” *5-Hour Energy*, 2017 WL 2559615, at \*8 (collecting cases).<sup>9</sup>

2 Plaintiffs’ complaint is premised on interpreting 29 C.F.R. § 1928.53 as requiring  
3 SxSs to be tested using the HP ratio. But plaintiffs have presented no evidence that any  
4 buyer shares that interpretation. Even the named plaintiffs have not adopted that  
5 interpretation; they had never read and had no understanding of § 1928.53. (*Supra*  
6 Background.E.) Nor have plaintiffs presented any survey or other evidence establishing  
7 that buyers have a commonly accepted understanding of the label. As plaintiffs bear  
8 the burden of proof, that failure is sufficient to deny their motion. *5-Hour Energy*,  
9 2017 WL 2559615, at \*8-9 (denying certification where “the meaning of the term  
10 ‘energy’ is disputed, and Plaintiffs have offered no evidence of a common definition of  
11 ‘energy’ among a substantial number of consumers”); *Pierce-Nunes v. Toshiba Am.*  
12 *Info. Sys., Inc.*, 2016 WL 5920345, at \*7 (C.D. Cal. June 23, 2016) (same where there  
13 was no common proof “that each class member had the same understanding of the  
14 product labeling”); *Jones v. ConAgra Foods, Inc.*, 2014 WL 2702726, at \*14-16 (N.D.  
15 Cal. June 13, 2014).

16 **4. No Inference Of Reliance Or Materiality Applies, And Any Such**  
17 **Inference Has Been Rebutted.**

18 While plaintiffs contend a material misrepresentation can provide an “inference”  
19 of reliance (Pls. Memo. at 18), myriad decisions reject any such inference and deny  
20 certification of misrepresentation claims where the record establishes individual  
21 differences. *First*, no such inference or presumption can arise where whether each  
22 putative class member read an alleged misrepresentation is an individual question:

23 Even if we assume that all ... contracts make the same representation,  
24 whether a particular class member has read that misrepresentation presents

---

25  
26 <sup>9</sup> See also *Townsend*, 303 F. Supp. 3d at 1046 (no class-wide materiality or reliance  
27 where representation did not have a common meaning or controlling definition);  
28 *Shanks*, 2019 WL 4398506, at \*4 (explaining that “scientific terms are unlikely to be  
understood by an average consumer,” much less be a factor in purchasing the product);  
*Schechner v. Whirlpool Corp.*, 2019 WL 4891192, at \*5 (E.D. Mich. Aug. 13, 2019);  
*Caro v. Procter & Gamble Co.*, 18 Cal. App. 4th 644, 668-69 (1993).

1 an individual question and not a common question. ... [R]eliance may not  
2 be presumed unless there is a showing that putative class members actually  
3 read their contracts and appellants have not made a factual showing that  
4 this presents a common rather than an individual inquiry.

5 *Sotelo v. MediaNews Grp., Inc.*, 143 Cal. Rptr. 3d 293, 306 (Cal. Ct. App. 2012),  
6 *disapproved of in part on other grounds by Noel v. Thrifty Payless, Inc.*, 445 P.3d 626  
7 (Cal. 2019).<sup>10</sup> Here, whether each buyer read the ROPS label (and, if so, exactly what  
8 they read) is an individual issue, with most not reading any portion of the label.

9 *Second*, no inference or presumption can arise where buyers had different reasons  
10 for their purchases. *E.g., Reynante*, 2018 WL 329569, at \*5 (plaintiffs’ argument that  
11 individual proof was unnecessary did not address whether common questions  
12 predominated; even if a customer was misled by a vehicle’s fuel calculator, “this does  
13 not necessarily mean that the calculation caused the customer to purchase the vehicle,”  
14 and “[i]ndividual inquiry would be necessary to determine whether it was the fuel  
15 calculator that induced his purchase”); *Safaie v. Jacuzzi Whirlpool Bath, Inc.*,  
16 2008 WL 4868653, at \*8-9 (Cal. App. Ct. Nov. 12, 2008) (given the “wide array of  
17 features” in a tub, the importance of a horsepower misrepresentation “was too  
18 individualized to support an inference of common reliance, and accordingly individual  
19 issues of reliance predominated over common issues”); *Johnson v. Harley-Davidson*  
20 *Motor Co. Grp. LLC*, 285 F.R.D. 573, 576, 581 (E.D. Cal. 2012) (denying certification  
21 because “while materiality is generally determined by the ‘reasonable consumer  
22 standard,’ there are numerous individualized issues as to whether the reasonable  
23 consumer purchasing one of Defendants’ motorcycles would find the excessive heat

---

24  
25 <sup>10</sup> *See also Mirkin v. Wasserman*, 858 P.2d 568, 574 (Cal. 1993) (precedents regarding  
26 inferring reliance “do not support an argument for presuming reliance on the part of  
27 persons who never read or heard the alleged misrepresentations”); *Davis-Miller v. Auto.*  
28 *Club of S. Cal.*, 134 Cal. Rptr. 3d 551, 565-66 (Cal. Ct. App. 2011); *iPhone Application*,  
6 F. Supp. 3d at 1026; *Campion v. Old Republic Home Protection Co., Inc.*, 272 F.R.D.  
517, 536 (S.D. Cal. 2011); *Friedman v. Old Republic Home Prot. Co., Inc.*,  
2015 WL 9948093, at \*4 (C.D. Cal. May 18, 2015); *Red v. Kraft Foods, Inc.*,  
2011 WL 4599833, at \*15 (C.D. Cal. Sept. 29, 2011).

1 material”).<sup>11</sup> Putative class members had myriad different reasons for their purchases.

2 *Third*, courts reject an inference and deny certification because of individual  
3 reliance where putative class members considered information from third-party sources.  
4 *E.g.*, *Pierce-Nunes*, 2016 WL 5920345, at \*8 (issues of materiality required  
5 individualized inquiry because consumers purchased televisions “based on a variety of  
6 factors, including their own research, speaking with sales people, comparison shopping,  
7 or recommendations from family, friends, or co-workers”); *Howard v. GC Servs., Inc.*,  
8 2015 WL 5163328, at \*9-10 (Cal. App. Ct. Sept. 3, 2015); *Moheb*, 2012 WL 6951904,  
9 at \*7. Putative class members relied on a wide variety of sources before purchasing  
10 their Polaris SxSs, with many not relying on Polaris communications at all.

11 *Fourth*, even if an inference could exist, it is rebutted by the evidence. Plaintiffs  
12 rely on *Stearns v. Ticketmaster Corp.* (Pls. Memo. at 18), which holds that “[i]f the  
13 misrepresentation or omission is not material as to all class members, the issue of  
14 reliance ‘would vary from consumer to consumer’ and the class should not be certified.”  
15 655 F.3d 1013, 1022-23 (9th Cir. 2011). Indeed, *Stearns* affirmed denial of a class  
16 certification motion because of the “myriad reasons that someone who was not misled”  
17 might sign up for a service. *Id.* at 1024. Numerous decisions cited in this Section I.A.  
18 have denied certification because of such individual differences.<sup>12</sup>

---

19  
20 <sup>11</sup> *See also In re Vioxx Class Cases*, 103 Cal. Rptr. 3d 83, 98-99 (Cal. App. Ct. 2009)  
21 (denying certification in case involving drug where some plaintiffs would use the drug  
22 if it were still available, patients received information from a variety of sources, and  
23 each consumer had his or her own preferences and characteristics); *Fairbanks v.*  
24 *Farmers New World Life Ins. Co.*, 128 Cal. Rptr. 3d 888, 906-07 (Cal. Ct. App. 2011);  
25 *Fine*, 2010 WL 3632469, at \*1, 4; *Webb*, 272 F.R.D. at 502-03; *Algarin v. Maybelline,*  
26 *LLC*, 300 F.R.D. 444, 457, 459 (S.D. Cal. 2014); 1 MCLAUGHLIN ON CLASS ACTIONS  
27 § 5:55 (17th ed. 2020) (“The existence of individualized issues of causation, reliance,  
28 and knowledge will preclude certification where class members’ decisions to enter into  
a transaction with defendant could be explained by considerations other than reliance  
on defendant’s alleged misrepresentations.”).

<sup>12</sup> Nor does the discussion regarding absent class members in *In re Tobacco II Cases*,  
46 Cal. 4th 298 (2009) change that no class can be certified on the record here. *Tobacco*  
*II*’s statements regarding such class members concern statutory standing and do not  
prevent certification being denied because of individual differences in reliance among  
putative class members. *E.g.*, *Cohen*, 101 Cal. Rptr. 3d at 48-49; *Davis-Miller*, 134 Cal.  
Rptr. at 564-65; *Tucker v. Pac. Bell Mobile Servs.*, 145 Cal. Rptr. 3d 340, 360-62 (Cal.

1           *Finally*, this is not a case where a handful of putative class members found the  
2 misrepresentation immaterial or did not rely on it. Surveys and individual testimony  
3 demonstrate that the vast majority of buyers did not consider the ROPS label in making  
4 their purchases. Accordingly, the record evidence establishes that individual,  
5 outcome-determinative issues of causation, reliance, and materiality predominate over  
6 any common issues.

7           **B. Differences In Whether Putative Class Members Have Any Injury**  
8           **And Received The Benefit Of Their Bargain Predominate.**

9           “If one gets the benefit of his bargain, he has no standing under the UCL.”  
10 *Johnson v. Mitsubishi Digital Elecs. Am., Inc.*, 365 F. App’x 830, 832 (9th Cir. 2010)  
11 (collecting cases); *see, e.g., Baker v. Yamaha Motor Corp.*, 2021 WL 388451, at \*4  
12 (Cal. Ct. App. Feb. 4, 2021) (“When a plaintiff gets the benefit of his bargain, he has  
13 no standing under the UCL and FAL.”) (collecting cases); *Lee v. Toyota Motor Sales,*  
14 *U.S.A., Inc.*, 992 F. Supp. 2d 962, 972 (C.D. Cal. 2014); *Waller v. Hewlett-Packard Co.*,  
15 295 F.R.D. 472, 487-88 (S.D. Cal. 2013); *In re Toyota Motor Corp. Hybrid Brake*  
16 *Mktg., Sales Practices & Prods. Liab. Litig.*, 915 F. Supp. 2d 1151, 1159 (C.D. Cal.  
17 2013). That holding applies equally to FAL and CLRA claims. *See Baker*,  
18 2021 WL 388451, at \*4; *Lee*, 992 F. Supp. 2d at 972-73; *Gaines v. Home Loan Ctr.,*  
19 *Inc.*, 2011 WL 13182970, at \*5 n.4 (C.D. Cal. Dec. 22, 2011).

20           For many putative class members, the ROPS label never became part of their  
21 bargain and thus they could not have been injured by the alleged misrepresentation. *See*  
22 *McGee v. S-L Snacks Nat’l*, 982 F.3d 700, 706 (9th Cir. 2020) (dismissing claims  
23 because plaintiff could not “show that she did not receive a benefit for which she  
24 actually *bargained*”). Some buyers purchased SxSs where third-party aftermarket  
25 ROPS had already been installed. (*E.g.*, Ex. 11, Milligan Decl. ¶ 8.) Plaintiffs’ putative  
26 class also includes those who purchased used SxSs, where the label (or the Polaris

27  
28  

---

Ct. App. 2012); *Campion*, 272 F.R.D. at 535; *Jones*, 2014 WL 2702726, at \*14; *Hobbs*  
*v. Brother Int’l Corp.*, 2016 WL 4734394, \*3-6 & n.1 (C.D. Cal. Sept. 8, 2016).

1 ROPS itself) could have been removed by the prior owner. Such buyers’ SxSs did not  
2 come with the ROPS label, which was not part of their bargain. Other buyers installed  
3 third-party aftermarket ROPS at or immediately after purchase, typically for aesthetic  
4 reasons. (*E.g.*, Ex. 6, Andersen Decl. ¶ 11.) Such buyers likewise did not consider  
5 alleged misrepresentations regarding the stock ROPS to be any part of their bargains.

6 More broadly, whether each buyer received the benefit of the bargain depends on  
7 individual evidence. The named plaintiffs admit their RZR’s have met their expectations  
8 and that they like or love their RZR’s, continue to regularly drive their RZR’s even after  
9 filing this lawsuit, and have had their young children ride in their RZR’s. (Ex. 27,  
10 Guzman Dep. at 12:7-15, 22:13-23, 23:21-24; 33:16-20, 46:10-16, 53:19-54:1,  
11 61:17-62:1; 69:1-10; 96:13-22; Ex. 28, Albright Dep. at 13:25-14:21, 15:5-6, 35:5-11,  
12 75:5-25, 94:25-95:2, 191:25-192:3; Ex. 30, Albright Supp. Resp. to Interrog. No. 12.)  
13 The Court would have to evaluate similar evidence to determine whether each Polaris  
14 SxS satisfied each buyer.

15 Whether each buyer has any economic loss also is an individual issue. Plaintiffs  
16 lack any evidence showing the label had a common impact on prices across thousands  
17 of different SxS purchases, or that all buyers experienced an economic injury. Instead,  
18 the record shows that Polaris SxS prices did not change after Polaris switched labels  
19 from OSHA to ISO requirements on the MY 2017 General. (*Supra* Background.I.)  
20 Evidence such as heterogenous market factors demonstrates that whether the label  
21 affected the price each buyer paid requires individual inquiries. (*Id.*)

22 Courts deny class certification based on individual differences in fact of injury  
23 and whether buyers received the benefit of the bargain. *Moheb*, 2012 WL 6951904, at  
24 \*4 (“the existence of economic injury is also not a common question, because many  
25 purchasers are satisfied”).<sup>13</sup> The same result should obtain here.

---

26  
27 <sup>13</sup> *Harley-Davidson*, 285 F.R.D. at 582 (denying certification where some class  
28 members had driven their allegedly defective motorcycles “for several years and ...  
thousands of miles” and so “should not be entitled to recover any damages”); *Sanchez*

1           **C. Differences In SxS Use Predominate For CLRA Claims.**

2           CLRA claims are limited to “[a]ny consumer who suffers any damages as a  
3 result” of conduct violating the CLRA. Cal. Civ. § 1780(a). “Consumer” is limited to  
4 individuals who purchase or lease “any goods or services for personal, family or  
5 household purposes.” Cal. Civ. § 1761(d); *see also Zepeda v. PayPal, Inc.*, 777 F. Supp.  
6 2d 1215, 1222 (N.D. Cal. 2011).

7           Particularly for Rangers, buyers differ in whether they use SxSs for personal,  
8 family, or household purposes, or for farming, ranching, or other business. (*Supra*  
9 Background.A.) Determining each SxS buyer’s purpose will require individual  
10 evidence, including how the buyer uses the SxS, their discussions with the dealership,  
11 and buyer testimony, creating an individual issue that predominates over any common  
12 questions for CLRA claims. *E.g., Harley-Davidson*, 285 F.R.D. at 582-83; *Arabian v.*  
13 *Sony Elecs., Inc.*, 2007 WL 627977, at \*14 (S.D. Cal. Feb. 22, 2007).

14           **D. Polaris Generals And Certain RZR Were Not Certified Under**  
15 **29 C.F.R. § 1928.53 And Cannot Be Part Of The Class.**

16           All Generals and the RZR XP Turbo S (2-seat variant), RZR Pro XP Turbo S,  
17 and RZR RS1 were certified to the ISO standard, not 29 C.F.R. § 1928.53, and are not  
18 part of plaintiffs’ putative class. (*Supra* Background.B.) To the extent plaintiffs seek  
19 to include them, whether any particular General or RZR vehicle in these categories had  
20 an OSHA ROPS label would be a predominant individual issue.

21           **II. PLAINTIFFS HAVE NOT PRESENTED A PROPER DAMAGES MODEL**  
22 **TO SUPPORT THEIR RULE 23(b)(3) CLASS.**

23           “[A]t the class-certification stage (as at trial), any model supporting a ‘plaintiff’s  
24 damages case must be consistent with its liability case.” *Comcast Corp. v. Behrend*,  
25 569 U.S. 27, 35 (2013). “And for purposes of Rule 23, courts must conduct a “‘rigorous  
26 analysis”” to determine whether that is so.” *Id.* Plaintiffs’ purported “cost-of-repair”

27  
28           \_\_\_\_\_  
*v. Wal Mart Stores, Inc.*, 2009 WL 1514435, \*2 (E.D. Cal. May 28, 2009); *Spacone v.*  
*Sanford, L.P.*, 2018 WL 4139057, at \*8 (C.D. Cal. Aug. 9, 2018).

1 measure fails this requirement for two independent reasons.

2 **A. Plaintiffs Fail To Present Evidence Of Difference In Value, Which Is**  
3 **Legally Required In Mislabeling Cases.**

4 The proper damages measure in mislabeling cases is “the amount necessary to  
5 compensate the purchaser for the difference between a product as labeled and the  
6 product as received.” *Townsend*, 303 F. Supp. 3d at 1048; *5-Hour*, 2017 WL 2559615,  
7 at \*10; *Reitman v. Champion Petfoods USA, Inc.*, 2019 WL 7169792, at \*13 (C.D. Cal.  
8 Oct. 30, 2019), *aff’d*, 830 F. App’x 880 (9th Cir. 2020); *NJOY*, 120 F. Supp. 3d at 1118.

9 Thus, in mislabeling cases, the proposed damages methodology *must* take into  
10 account the value the consumer received from the product, and compensate plaintiff for  
11 no more than the difference in value between the product as promised and as delivered.  
12 *Chowning v. Kohl’s Dep’t Stores, Inc.*, 733 F. App’x 404, 405 (9th Cir. 2018) (“Under  
13 California law, where a plaintiff obtains value from the product, the proper measure of  
14 restitution is the difference between what the plaintiff paid and the value of what the  
15 plaintiff received.”); *Shanks*, 2019 WL 4398506, at \*7 (class certification denied where  
16 plaintiff had not met his burden of showing what “portion of the sale price was  
17 attributable to the value consumers placed” on an alleged misrepresentation); *Alvarez*  
18 *v. NBTY, Inc.*, 331 F.R.D. 416, 426 (S.D. Cal. 2019); *In re POM Wonderful LLC*,  
19 2014 WL 1225184, at \*2-5 (C.D. Cal. Mar. 25, 2014); *Brazil v. Dole Packaged Foods,*  
20 *LLC*, 660 F. App’x 531, 534-35 (9th Cir. 2016). Only when a misrepresented product  
21 has no value whatsoever may plaintiffs receive a full refund. *Reitman v. Champion*  
22 *Petfoods USA, Inc.*, 830 F. App’x 880, 882 (9th Cir. 2020).

23 Here, plaintiffs’ hypothetical cost-of-“repairs”—which do not repair anything  
24 since plaintiffs do not allege any defect—involve replacement ROPS that would  
25 provide the equivalent of a full refund of the value of the ROPS component. (Pls.  
26 Memo. at 12-13.) But plaintiffs do not provide any evidence that the allegedly  
27 mislabeled ROPS has no value. Plaintiffs’ damages theory thus violates California law.

28 Ignoring this case law, plaintiffs rely on the inapposite decision in *Nguyen v.*

1 *Nissan North America, Inc.*, 932 F.3d 811 (9th Cir. 2019). *Nguyen* involved an alleged  
2 vehicle defect, unlike in this case where plaintiffs expressly disclaim any design defect  
3 theory. (Pls. Memo. at 1 n.2.) **HIGHLY CONFIDENTIAL -- Subject to Court Order**

4 [REDACTED]  
5 [REDACTED] Plaintiffs conflate the allegedly “defective *per*  
6 *se*” components in *Nguyen* with the allegedly mislabeled—but admittedly not  
7 defective—SxS ROPS. (Pls. Memo. at 12.)

8 This distinction is key, because (as plaintiffs recognize) the Ninth Circuit found  
9 that replacement cost was an appropriate proxy for plaintiffs’ damages in *Nguyen* only  
10 because the part was defective and thus valueless. *Id.* at 11 (noting that Ninth Circuit  
11 allowed damages that “would ‘deem the defective part valueless’”). Thus, in *Nguyen*,  
12 the court permitted plaintiff to seek “the cost of replacing a defective component, which  
13 is a proxy for his overpayment of the vehicle at the point of sale.” 932 F.3d at 821.

14 *Nguyen*’s finding based on a defective and valueless component cannot apply to  
15 this case, which involves a label, not any alleged defect, without any evidence that the  
16 ROPS itself is valueless. Polaris has not located any case law applying *Nguyen*’s  
17 cost-of-repair measure without an alleged defect.<sup>14</sup> Instead, in mislabeling cases not  
18 involving defects, the Ninth Circuit and this district have held that plaintiffs must  
19 consider the value of a mislabeled product in determining damages. *E.g.*, *Chowning*,  
20 733 F. App’x at 405; *Shanks*, 2019 WL 4398506, at \*7.

21 Polaris’s expert evidence additionally confirms the impropriety of using  
22 cost-of-repair as a proxy in this case. There is no evidence that the presence of the  
23 ROPS label affects Polaris SxS prices, let alone renders the ROPS valueless. (*Supra*  
24 Background.I.) Moreover, any effects on prices would differ across the various SxS  
25 models in the alleged class based on differing demand and supply inputs, transaction

26 \_\_\_\_\_  
27 <sup>14</sup> The Ninth Circuit’s rejection of considering “post-purchase value” is likewise  
28 inapplicable here. *Nguyen*, 932 F.3d at 820-21. The allegedly mislabeled ROPS have  
a value greater than zero—and plaintiffs and their expert do not contend otherwise—  
but plaintiffs’ cost-of-repair damages nonetheless treat the ROPS as valueless.

1 prices, and other factors (*id.*), **HIGHLY CONFIDENTIAL -- Subject to Court Order**. This real-world  
2 evidence demonstrates that cost-of-repair damages would provide plaintiffs with far  
3 more than the benefit-of-the-bargain and thus cannot constitute proper class-wide  
4 damages.<sup>15</sup> (Ex. 3, Langer Rep. ¶¶ 16, 119-23.)

5 **B. Plaintiffs’ Proposed Damages Do Not Match Their Liability Theory.**

6 Certification also is impermissible here because plaintiffs’ proposed damages are  
7 untethered to their liability theory, violating *Comcast*, 569 U.S. at 35. Plaintiffs’  
8 liability theory is that the ROPS allegedly violate 29 C.F.R. § 1928.53, but their  
9 proposed damages are based on “repairs” that do not satisfy plaintiffs’ interpretation of  
10 29 C.F.R. § 1928.53.

11 **CONFIDENTIAL -- Subject to Court Order**

12  
13 **HIGHLY CONFIDENTIAL -- Subject to Court Order**

14 Plaintiffs admitted in  
15 their interrogatory answers they could not identify any such ROPS. (*Supra*  
16 Background.B.) Plaintiffs also have presented no evidence of what building a ROPS  
17 satisfying plaintiffs’ interpretation of § 1928.53 for each SxS configuration would cost,  
18 how that ROPS would affect the vehicle’s operation, or whether any consumer would  
19 even want it. (Ex. 1, Breen Rep. at 23-24.) Indeed, there are no aftermarket ROPS  
20 available for certain RZR models and model years, or for Rangers generally. (*Id.* at 15-  
21 18, 24; Ex. 3, Langer ¶¶ 109-110.) The potential costs for building and certifying a

22  
23 <sup>15</sup> Where the cost to bring a product into compliance with a label may be lower than the  
24 price differential between the mislabeled product and the product as represented,  
25 damages representing the cost to bring the product into compliance would more  
26 accurately measure the benefit-of-the-bargain without providing a windfall. (Ex. 3,  
27 Langer Rep. ¶¶ 20-21.); *see also In re Gen. Motors LLC Ignition Switch Litig.*, 407 F.  
28 Supp. 3d 212, 225 (S.D.N.Y. 2019) (“California courts have also followed the  
traditional rule that the measure of damages for tortious injury to personal property—  
such as an automobile—is the lesser of the diminution in value or the reasonable cost  
of repairs.”) (collecting cases). However, those circumstances do not apply here where  
the price differential is zero, and plaintiffs do not even purport to present damages that  
would bring the ROPS into compliance with their interpretation of 29 C.F.R. § 1928.53.

1 compliant ROPS structure for each SxS configuration in the class will vary significantly  
2 depending on the particular vehicle (Ex. 1, Breen Rep. at 24-28), and [REDACTED]

3 [REDACTED]  
4 [REDACTED] In short, Kneuper’s opinion is purely speculative and  
5 he does not provide any evidence he can properly calculate damages. (Ex. 3, Langer ¶¶  
6 17-18, 94-123.)

7 *Miller v. Fuhu Inc.*, 2015 WL 7776794, at \*20 (C.D. Cal. Dec. 1, 2015), is  
8 instructive. The *Miller* plaintiff proposed that damages could be calculated based on  
9 the cost-to-repair allegedly defective charging systems in computer tablets. The court  
10 rejected this proposal because “at present it is not clear that a viable means of repairing  
11 the defect in the Nabi tablets exists.” *Id.* The cost of a replacement charger also was  
12 an inappropriate way to calculate damages, because “it is not clear that simply replacing  
13 the charger will cure the defect.” *Id.* Likewise, plaintiffs here have presented no  
14 evidence by which the ROPS could be replaced or “repaired” so that they comply with  
15 plaintiffs’ interpretation of 29 C.F.R. § 1928.53.

16 Even if plaintiffs had attempted to present a damages methodology where Polaris  
17 stock ROPS would be modified to satisfy plaintiffs’ interpretation of § 1928.53—rather  
18 than replaced with other ROPS that also do not satisfy that regulation—[REDACTED]

19 [REDACTED]  
20 [REDACTED] (Ex. 1, Breen Rep. at 24-28; Ex. 3, Langer Rep. ¶¶ 17-18, 94-100, 114-  
21 18); *see Opperman v. Path, Inc.*, 2016 WL 3844326, at \*14 (N.D. Cal. July 15, 2016)  
22 (rejecting proposed damages based on averages that likely “would overcompensate  
23 some class members, while undercompensating others”); *cf. Nguyen*, 932 F.3d at 816,  
24 819 (plaintiff proposed the same repair for all vehicles by replacing component made  
25 from composite materials with a solid cast-aluminum component).

26 Plaintiffs implicitly acknowledge these problems by suggesting that “[w]hen  
27 discovery has not closed, it may be appropriate to certify a class based on a proposed  
28 damages model subject to possible decertification after close of discovery.” (Pls.

1 Memo. at 24.) But the deadline for plaintiffs’ class expert reports was January 13, 2021  
2 (ECF No. 63), and thus the time for presenting any class-wide damages model has  
3 closed. Moreover, plaintiffs have not submitted any expert reports identifying any SxS  
4 ROPS or modifications complying with their interpretation of 29 C.F.R. § 1928.53, nor  
5 showing how any such ROPS or modification could be applied to all the SxS  
6 configurations in their class definition. (Ex. 1, Breen Rep. at 24-28; Ex. 26, Kneuper  
7 Dep. at 37:18-39:19.) And plaintiffs’ failure to tether their damages to their liability  
8 theory does not represent a flaw that can be fixed following further discovery, but  
9 instead fundamentally violates *Comcast*. See, e.g., e.g., *Doyle v. Chrysler Grp., LLC*,  
10 663 F. App’x 576, 579 (9th Cir. 2016) (reversing class certification because there was  
11 “no way to determine whether the proposed damages model measures damages that are  
12 solely attributable to the theory of liability”). Plaintiffs’ failure to provide a class-wide  
13 damages methodology tracking their liability theory requires denial of certification.

14 **III. PLAINTIFFS’ PROPOSED CLASS IS NEITHER SUPERIOR NOR**  
15 **MANAGEABLE AS REQUIRED UNDER RULE 23(b)(3).**

16 A Rule 23(b)(3) class action can be certified only if “a class action is superior to  
17 other available methods for fairly and efficiently adjudicating the controversy.” Fed.  
18 R. Civ. P. 23(b)(3). Courts consider four factors for superiority, which all weigh against  
19 certification here. Fed. R. Civ. P. 23(b)(3)(A)-(D); *Zinser*, 253 F.3d at 1190-92.

20 *First*, any class would be unmanageable. “If each class member has to litigate  
21 numerous and substantial separate issues to establish his or her right to recover  
22 individually, a class action is not ‘superior.’” *Zinser*, 253 F.3d at 1192; *see also*  
23 *Reynante*, 2018 WL 329569, at \*5. Here, each buyer would have to litigate whether he  
24 or she read the ROPS label, relied on it, would have purchased the SxS regardless of  
25 the label, what the buyer understood the label to mean, the buyer’s use and satisfaction  
26 with their SxS, and other individual issues. *See also In re Bridgestone/Firestone, Inc.*,  
27 288 F.3d 1012 (7th Cir. 2002); *Robinson v. Tex. Auto. Dealers Ass’n*, 387 F.3d 416 (5th  
28 Cir. 2004); *In re LifeUSA Holding Inc.*, 242 F.3d 136 (3d Cir. 2001).

1           *Second*, the extent and nature of this litigation weighs against certification.  
2           *Zinser*, 253 F.3d at 1191. *Zinser* held this factor weighed against certification where  
3           there were thousands of putative class members but only nine lawsuits were pending.  
4           *Id.* Likewise, Polaris is aware of only two other cases (both in state court) alleging  
5           Polaris miscalculated compliance with 29 C.F.R. § 1928.53 by using the GVW.

6           *Third*, there is no desirability to concentrating the litigation in this forum because  
7           this is the only federal suit making these allegations. Moreover, buyers are scattered  
8           across the state, and defense witnesses largely are in Minnesota. *See id.* at 1191-92.

9           *Fourth*, each buyer has an interest in individually controlling separate actions.  
10          Because of the myriad, differing facts, any buyer who believed they have a claim would  
11          want to file their own complaint rather than relying on two plaintiffs subject to unique  
12          defenses. (*Supra* Background.E; *infra* Section IV.D.) Plaintiffs assert that the potential  
13          recovery is too slight for individual suits (Pls. Memo. at 24-25), but courts in similar  
14          cases hold that individual claims are sufficient because plaintiffs can obtain statutory  
15          damages, attorney’s fees, or punitive damages. *E.g.*, *Sanneman v. Chrysler*, 191 F.R.D.  
16          441, 456 (E.D. Pa. 2000); *Rosen v. Chrysler Corp.*, 2000 WL 34609135, at \*15 (E.D.  
17          Mich. July 18, 2000). Plaintiffs claim that each buyer has approximately \$1,000 in  
18          damages (Pls. Memo. at 25), and also seek “attorneys’ fees” and “statutory enhanced  
19          damages” (ECF No. 39, 2d Am. Compl. at 32). These potential recoveries incentivize  
20          any owner who believes he or she has a meritorious individual claim to pursue it.

21          **IV. NAMED PLAINTIFFS ARE NEITHER TYPICAL NOR ADEQUATE**  
22          **CLASS REPRESENTATIVES.**

23                  **A. The Named Plaintiffs Have No Legally Viable Claims.**

24          If a named plaintiff cannot state a claim against the defendant, then he or she  
25          cannot have typical claims or be a class representative. *E.g.*, *E. Tex. Motor Freight Sys.*  
26          *Inc. v. Rodriguez*, 431 U.S. 395, 403-04 (1977). As explained in Polaris’s Motion for  
27          Summary Judgment, both plaintiffs’ claims fail for several independent reasons. (ECF  
28          No. 85.) Without a representative, no class can be certified. *E.g.*, *E. Tex. Motor*, 431

1 U.S. at 403-04. Moreover, even if the Court denies summary judgment based upon  
2 factual disputes for each plaintiff, that would confirm the lack of typicality by  
3 illustrating that each plaintiff’s individual claim turns on his particular facts.

4 **B. The Disparate Individual Facts Establish That No Claim Is Typical.**

5 The different individual facts for each SxS buyer demonstrate that “no claim is  
6 typical of another in the sense of providing common answers, and leaves the ‘class’ no  
7 more than a diverse and unmanageable aggregation of individual claims, better dealt  
8 with separately.” *Football Ass’n Premier League Ltd. v. YouTube, Inc.*, 297 F.R.D. 64,  
9 68 (S.D.N.Y. 2013).<sup>16</sup> Even if the named plaintiffs could prove their own claims based  
10 on their individual facts (which Polaris disputes), that could not prove the claims of  
11 buyers who never saw or read any part of the ROPS label; did not consider the label in  
12 purchasing their SxSs; purchased a SxS with the intent of installing an aftermarket  
13 ROPS; or have other differing, outcome-determinative characteristics.

14 **C. Plaintiffs Are Atypical In Claiming They Considered The Label.**

15 The two named plaintiffs are atypical in asserting that they considered the ROPS  
16 label in buying their RZR, as most buyers did not notice, much less read or consider,  
17 the label. *E.g., Algarin v. Maybelline, LLC*, 300 F.R.D. 444, 458 (S.D. Cal. 2014)  
18 (“Based upon the evidence presented, the named Plaintiffs’ reliance on the alleged  
19 misrepresentation was not typical of other class members.”); *Fine v. ConAgra Foods,*  
20 *Inc.*, 2010 WL 3632469, at \*3-4 (C.D. Cal. Aug. 26, 2010).<sup>17</sup> Plaintiffs’ atypicality also  
21 is shown by their experience with OSHA from their construction industry work, which  
22 they claim caused them to notice the label’s reference to OSHA. (Ex. 27, Guzman Dep.

23  
24 <sup>16</sup> See also *Romberio v. Unumprovident Corp.*, 385 F. App’x 423, 431 (6th Cir. 2009);  
25 *Broussard v. Meineke Discount Muffler Shops, Inc.*, 155 F.3d 331, 340 (4th Cir. 1998);  
26 *McKinnon v. Dollar Thrifty Auto. Grp., Inc.*, 2015 WL 4537957, at \*10 (N.D. Cal.  
27 July 27, 2015); *Robinson v. Am. Corp. Sec., Inc.*, 2009 WL 10669403, at \*6-7 (C.D.  
28 Cal. May 20, 2009).

<sup>17</sup> *Moheb*, 2012 WL 6951904, \*5 (plaintiff “would not be an adequate representative for  
those members of the Class that did derive benefit from” a product); *Caro*, 18 Cal. App.  
4th at 665 (claims of plaintiffs who read only a portion of label “would be typical of  
only those persons whose reading of the label was similarly limited”).

1 at 15:1-17, 23:25-24:8, 159:14-17; Ex. 28, Albright Dep. at 57:21-58:7, 59:1-4,  
2 67:13-68:7, 183:2-184:1.) Indeed, in opposing summary judgment, plaintiffs  
3 repeatedly emphasize their construction experience. (ECF No. 102-1 at 1-2, 8-9, 12.)  
4 Few buyers work in the construction industry or have the same exposure to OSHA.

5 **D. The Named Plaintiffs Are Subject To Unique Defenses.**

6 “Class certification is inappropriate where a putative class representative is  
7 subject to unique defenses which threaten to become the focus of the litigation.”  
8 *Mansfield v. Midland Funding, LLC*, 2011 WL 1212939, at \*6 (S.D. Cal. Mar. 30,  
9 2011); *see Banarji v. Wilshire Consumer Capital, LLC*, 2016 WL 595323, at \*3 (S.D.  
10 Cal. Feb. 12, 2016). The “presence of even an arguable defense peculiar to the named  
11 plaintiff or a small subset of the plaintiff class may destroy the required typicality of the  
12 class as well as bring into question the adequacy of the named plaintiff’s  
13 representative.” *Mansfield*, 2011 WL 1212939, at \*6 (quoting *J.H. Cohn & Co. v. Am.*  
14 *Appraisal Assocs.*, 628 F.2d 994, 999 (7th Cir. 1980)); *Banarji*, 2016 WL 595323, at  
15 \*3; *Cholakyan v. Mercedes-Benz, USA, LLC*, 281 F.R.D. 534, 557-58 (C.D. Cal. 2012).

16 Each named plaintiff’s testimony establishes that he is subject to unique defenses  
17 regarding reliance, causation, and fact of injury. Neither plaintiff read the entire label,  
18 but only two words (Guzman) or a portion (Albright). (*Supra* Background.E.) Neither  
19 plaintiff understood what they read or could explain how the label was false or  
20 misleading. (*Id.*) Both plaintiffs mistakenly believed the label said “OSHA-approved,”  
21 and considered that non-existent term rather than the label’s actual language. (Ex. 27,  
22 Guzman Dep. at 26:6-23, 27:10-25, 142:4-13, 148:14-149:7; Ex. 28, Albright Dep. at  
23 65:25-66:15, 148:8-23, 149:11-3, 172:25-173:8.) Both plaintiffs’ beliefs about the label  
24 were based on their construction industry experience. (*Supra* Section IV.C.) Plaintiffs  
25 continued to drive their RZR’s after filing suit, had their children ride with them, and  
26 testified their RZR’s met their expectations. (*Supra* Section I.B.)

27 **V. PLAINTIFFS CANNOT CERTIFY ANY RULE 23(b)(2) CLASS.**

28 Plaintiffs’ demand for class certification to enter an injunction “requiring Polaris

1 to remove or revise its OSHA stickers” (Pls. Memo. at 22), fails for multiple reasons.  
2 Initially, for the reasons explained in Polaris’s summary judgment motion, the two  
3 named plaintiffs have no claims for injunctive relief (or any other claims), and thus  
4 cannot seek certification of these claims. (ECF No. 85 at 19-24.) Indeed, plaintiffs  
5 offer no opposition to Polaris’s argument that Guzman’s injunctive relief claims are  
6 barred by his having an adequate legal remedy. (ECF No. 102-1 at 2, 21-22.) Moreover,  
7 the two named plaintiffs are not typical or adequate. (*Supra* Section IV.) Therefore,  
8 plaintiffs cannot satisfy the requirements for Rule 23(a) and no class can be certified.

9 Additionally, no Rule 23(b) class can be certified because “final injunctive relief”  
10 is not “appropriate respecting the class *as a whole*.” Fed. R. Civ. P. 23(b)(2) (emphasis  
11 added). “Rule 23(b)(2) applies only when a single injunction or declaratory judgment  
12 would provide *relief to each member of the class*.” *Wal-Mart Stores, Inc. v. Dukes*,  
13 564 U.S. 338, 360 (2011) (emphasis added); *see also id.* at 362 (Rule 23(b)(2) classes  
14 seek “an indivisible injunction *benefiting all its members* at once”) (emphasis added).

15 Courts deny Rule 23(b)(2) certification when an injunction would not benefit all  
16 putative class members. In *Moheb*, plaintiffs alleged that the drug Cosamin’s label  
17 misrepresented that it reduced joint pain and protected cartilage. 2012 WL 6951904, at  
18 \*1. The *Moheb* court denied Rule 23(b)(2) certification because many putative class  
19 members would not benefit from any injunctive relief regarding Cosamin’s labeling:

20 Plaintiff and other members of the Class no longer buy Cosamin and, thus,  
21 will obtain no benefit from an injunction concerning Defendant’s  
22 advertising because they cannot demonstrate a probability of future injury.  
23 Similarly, members of the class who continue to use Cosamin and have  
24 derived some benefit from it will not benefit from an injunction concerning  
25 Defendant’s advertising because they have suffered no injury as a result of  
26 their purchase of Cosamin and will likely continue to buy Cosamin in the  
27 future regardless of its advertising.

1 *Id.* at \*6 (collecting cases).<sup>18</sup>

2 Here, any injunction requiring Polaris to remove or revise the ROPS label will  
3 provide no benefit to putative class members. *First*, the putative class consists of those  
4 who already have purchased Polaris SxSs, who cannot benefit from changing the label.  
5 *Second*, a buyer who learns of an alleged misrepresentation regarding a product lacks  
6 standing to seek injunctive relief unless, at a minimum, the buyer intends to purchase  
7 that product again in the future. *E.g.*, *Lanovaz v. Twinings N. Am., Inc.*, 726 F. App'x  
8 590 (9th Cir. 2018); *Yu v. Dr Pepper Snapple Grp., Inc.*, 2020 WL 5910071, at \*8 (N.D.  
9 Cal. Oct. 6, 2020); *Prescott v. Nestle USA, Inc.*, 2020 WL 3035798, at \*6 (N.D. Cal.  
10 June 4, 2020). Plaintiffs do not present any evidence that putative class members intend  
11 to purchase another Polaris SxS in the future (and especially not a SxS in plaintiffs'  
12 class definition), and many will not. *Third*, most buyers never saw the ROPS label, did  
13 not consider it, and do not care about it. These buyers have no injury from any alleged  
14 misrepresentation; they cannot establish causation, materiality, or reliance and  
15 causation; and will receive no benefit from changing a label in which they have no  
16 interest. *Fourth*, many buyers installed an aftermarket ROPS without any labels, or  
17 bought a Polaris SxS that already had an aftermarket ROPS installed without the Polaris  
18 label. Such buyers could not have been injured by any alleged misrepresentation, and  
19 would not benefit from the label being omitted from the stock ROPS or from revised  
20 labels that have no applicability to their aftermarket ROPS.

21 Thus, as in *Moheb* and other decisions, a classwide injunction provides no benefit  
22 to many class members, and thus no Rule 23(b)(2) class should be certified.

23 **CONCLUSION**

24 Polaris respectfully requests that the Court deny class certification.  
25
